**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant is claiming:

"at said abutted portion, arranging a third member at an outer side beyond said first member and an outer face of said second member, and carrying out a friction stir welding to said abutted portion using a rotary tool which is inserted in said third member and said abutted portion from said third member".

And

"overlapping a third member to an end portion of said first member at said abutted portion and an end portion of said second member, and carrying out friction stir welding at said abutted portion using a rotary tool which is inserted in said third member and said abutted portion".

In the instant application, the only mention of the "third member" is in the abstract, which states "The panels 31, 32 each have two substantially parallel plates 33, 34 and a third member 35 connecting the two plates 33, 34". Thus, the subject matter in the claims is not described in the specification. This subject matter is also not found in the parent application 08/820,231 including the originally filed claims. If the applicant

attempts to put these limitations in the instant application, the examiner will have to make a new matter rejection unless the applicant is able to convince the examiner that the claimed subject matter has been previously disclosed.

### ***Conclusion***

The prior art of record that is cited as of interest is presented on the form-892.
